The return of an item of equipment to the Contractor for repair and overhaul constitutes authorization for such work under the contract without further authorization or approval from the Contracting Officer. The Contractor will determine as early as possible after receipt of any reparable component, whether the estimated price for all services and materials to be furnished by the Contractor in the repair thereof, will exceed sixty-five percent (65%) of the selling price of that component. As soon as the Contractor has determined that any component falls in this category, a written report of this determination, with a cost breakdown, will be submitted to the Contracting Officer for instruction either to repair or dispose of said component.
